Plastic Six Pack Holders.....100 Years
Glass Bottles.....1,000,000 Years
Plastic Bottles.....Indefinitely
Styrofoam.....Indefinitely

Help Keep Our Trails Pristine

If you pack it in,
pack it out.

“A true conservationist
is a man who knows the
world is not given by his
fathers, but borrowed
from his children.”

- John James
Audubon

Drawings by Amelia Richards
2015

Recreate Responsibly

Please, Take nothing but
pictures and leave nothing
but footprints.

Litter isn't just an eyesore...

- Small animals can get their heads trapped in bottles trying to lick the sweet leftovers.
- Birds will try to eat small shiny objects.
- 6 pack holders can get caught around animals necks.

Friendly Fires

Keep your campfires low impact by following these tips...

Fire fuel should be **Dead and Down**

- Live branches and green wood do not burn well.
- Tearing branches down creates open wounds, exposing the tree to disease and parasites

Use existing fire sites to limit charred spots in the area.
